

Odour Warrior with Vent Stack

This inbuilt vent stack can take the place of a fixed vent pipe on new or existing wet well thus giving venting, odour control, fat and H₂S reduction from the one machine in a very cost effective manner.

Odour Warrior

This Odour Warrior can take the place of large or small carbon filters, odour beds and other odour control measures at a fraction of the cost and minimal space requirements.

The Odour Warrior has been well proven for more than 20 years. A great leap forward in both design, efficiency and cost reductions both capital and running costs. The Warrior swiftly and completely eliminates odours by creating a fog of N₂ in the wet well confined space. N₂ has no smell therefore is not a masking agent but a true biological odour eliminator, non toxic and bio-degradable.

Benefits:

- LOW CAPITAL COST
- LOW RUNNING COST
- LOW MAINTENANCE
- MULTIPLE BENEFITS FROM A SINGLE UNIT
- NO HAZARDOUS WASTE TO DISPOSE OF
- AUSTRALIAN DESIGNED AND MANUFACTURED
- PERFORMANCE IS GUARANTEED
